**Ethiopia May  
Not Be Given  
Red Cross Aid**

LONDON, July 9.—The merciful ministrations of the Red Cross may be withheld from Ethiopia in case of war with Italy because Emperor Haile Selassie has got so many of his soldiers will not mutilate captives, according to Field Director T. A. Lambie of the Ethiopian mission service.

Mr. Lambie explained the emperor had given him a written pledge his word in this regard because of the almost uncontrollable nature of the savagery of the Ethiopian frontier tribes. The mission director is trying to organize an air ambulance for Ethiopia.

CHURCH REVOLT  
TRIAL HALTED

CHICAGO, July 9.—The ecclesiastical trial of Dr. J. O. Martin, suspended from the Presbyterian church ended abruptly last night when the judicial committee of the Chicago Presbytery ruled that he had not been properly brought according to procedure of the church.

**Martial Law Ends**

BATON ROUGE, La., July 9.—Six months of martial law in Louisiana's state capital were ended today when the remaining National Guard troops evacuated the parish.

# GT. BRITAIN WANTS NO NAVAL RACE WITH U.S.

## Camp Ringleaders Ejected; Taken For Ride; Police Look On

Ottawa, July 9.—While two detachments of Royal Canadian Mounted Police and the full strength of airmen at Ottawa air station stood by, leaders of the Rockcliffe relief camp workers strike were last night ejected from the camp. The Rockcliffe project is a part of the air station. Virtual termination of the strike was expected as the leaders were loaded on a truck and brought to Ottawa, five miles from the camp.

"The strike will probably end now," J. S. Downham, spokesman for the group said as they left the camp.

### TAKEN TO OTTAWA

In Ottawa the men unloaded from the truck and held a brief meeting with a single mounted policeman and one airman and dispersed quietly.

The Rockcliffe strike started Monday morning when 125 of 500 men who had been held at a mass meeting and presented "demands" of \$1 per day wages, changes in working conditions and transfer of the camp from department of national defense to department of national resources.

### SYMPATHY STRIKE

The strike was sympathetic with a strike at Valcartier, Que., camp strike leaders said. Similar demands were presented.

Report to Ottawa came from Lt. Col. G. C. Wing, commanding officer, Ottawa, A. E. Godfrey, office commanding of Ottawa air station and Mr. H. C. Cudde, who said, the men struck without presentation of any complaint.

As strike leaders and names of the leaders were read off, J. S. Downham, spokesman of the group, said, "We are here to tell you that if you are going to let them put us out." He had been a leader of a strike at Rockcliffe, which ended camp when the men walked into Ottawa over the air he said.

### MOUNTED POLICE ARRIVE

As detachment arrived a detachment of 24 Royal Canadian Mounted Police under Superintendent J. M. Tupper, who had been called in to relieve the relief camp time office.

Another detachment of 20 mounted police had been sent under command of Inspector A. T. Belcher. For a few minutes a pitch battle ensued between strike leaders addressed the men. Following Downham and other strike leaders, Mr. Cudde, who addressed Godfrey addressed the men.

### EVICTED, NOT ARRESTED

My orders are to see the leaders leave, but I have been told that they do not go peacefully to use what ever force may be necessary," he added. Several of the leaders interrupted.

The strike of 10 men was read off by Superintendent H. C. Wing, the relief project. They were: J. S. Downham, H. J. Cavaughn, W. Jackson, G. C. Wing, S. S. McFetridge, J. Moore, J. Ball, T. W. Cooper, J. Thorne and R. S. Morel.

### PROTEST ACTION

Some 200 men named about that they were not agitators. "I am a returned man and not a Communist," one said.

The records of each man had been investigated, he was told. His record was good, he said. The camp commander told the men the camp commandant told Moore.

"Let them arrest us and take us to jail," he said. "We'll fight the case in court."

There were to be no arrests he was told, with the exception of the 10 who had been named as agitators.

### JUST PAID-OFF

The strike was first filed into the paymaster's office and received their pay under the 20 cents per diem allowance. Several of the men who had been in truck or tractor driving duty were paid off at the rate of \$20 per month, the rate for work.

**Will Humanize British Radio**

LONDON, July 9.—Steps are being taken to humanize the British Broadcasting Corporation. In much the same way as the post office has been humanized and given publicity.

Sir Stephen Thomas, present public relations officer to the post office, has been appointed B.B.C. controller of public controllers. R. H. Thompson, who had helped to organize the Canadian Radio Commission, has been released to organize the B.B.C. controller of public controllers.

On the other side of the pond, will have two assistant controllers, it was announced yesterday. R. H. Thompson, who had helped to organize the Canadian Radio Commission.

### Regina Riot Shot Victim Wins \$10,000

REGINA, July 9.—Menigitis brought a serious turn yesterday in the Regina riot. The hospital orderly who shot in the spine by a rifle bullet during last week's riot, he is being admitted to the hospital by Dr. W. A. Harvie.

Constable John R.G.C.M.P. was reported to be making good recovery from head injuries.

Two RCMP constables and four citizens were charged from hospital yesterday afternoon.

### Dine At White House

LONDON, July 9.—John Price, prime minister of Australia, Joseph A. Lyons, and his wife, were dining at the White House tonight.

### Liberal Activities

Tuesday, July 9.—Public meeting St. Luke's Hall, Bonnefond, 8 p.m. Wednesday, July 10.—8 p.m. E. Broadbent, speaker. Thursday, July 11.—Public meeting Club Rooms, 8 p.m. under Union Temperance League. Friday, July 12.—Public meeting Alberta Avenue Community Hall, 8 p.m.—Van Alten.

## Just a Short-Short Ferry Story

In Yonkers, N.Y., shorts are a short cut to jail, so the good Yonkers Ferry has come to the aid of beauties distressed by the propensity to wear skirts for their holiday hikes. Presto. A skirt-checking service was established for those who cross the Hudson by boat to go hiking on the opposite New Jersey shore. Joan Christy and May Chadwick seem to enjoy giving the law the ferry slip.

### W. R. STRINGER GRIT CHOICE OF INNISFAIL

W. R. Howson Given Ovation at Enthusiastic Riding Convention

INNISFAIL, July 9.—Attended by delegates from all over the riding and with enthusiasm hitting a new high mark for this constituency, W. H. Stringer was unswervingly chosen as standard-bearer for the riding in the coming provincial general election.

The convention was attended and addressed by W. R. Howson, R.C.C. candidate for Innisfail, and Mr. Philip J. Cuddy, member of Parliament.

After addressing the branch leaders, Mr. Stringer was asked to offer his congratulations, moved that the nomination be made unanimous.

ONE BALLOT

The first order of business was that of nominating a candidate.

The following names were submitted for the convention: Mr. Stringer, F. J. Cuddy, Malcolm, M. P. Phillips, Joseph Hanan.

After addressing the branch leaders, Mr. Stringer was asked to offer his congratulations, moved that the nomination be made unanimous.

There were in attendance representatives of the United Farmers of Alberta, the Social Credit party, the Progressives, who appealed to the convention to nominate what they termed "the best man" and the candidates—candidates who would be named for the purpose of defeating the Conservative party in the general election.

Mr. Howson, leader of the G.D.P. and member of the House of Commons for Winnipeg North Centre declared on the proposal and placed Mr. Stringer in the field as a straight ticket candidate.

He was elected.

The convention turned thumbs up on the proposal and placed Mr. Stringer in the field as a straight ticket candidate.

The Stevens point of view on the proposed credit bill was held in 1933, but who felt that in view of the fact that the political picture has changed so greatly since that time the Liberal party of the riding should be given another opportunity to express themselves on the subject.

GOWSON OVATION

Gowson received a tremendous ovation when he rose to speak. Mr. Gowson, who has been a member of the Liberal platform monetary reform committee, was elected to two paramount planks in the Liberal platform monetary reform.

"The Liberal party," he said, "stands for a publicly owned credit system which will under the control of the government regulate the money supply, control production and credit and manage the monetary system in terms of public need. It stands for the standardization of the people and for the further purpose of advancing the economic security of the nation, the economy and the stability of the nation."

WINNIPEG WRECKED

Continuing, Mr. Gowson declared:

"Hurry once in control will wreck our economy and the control of the issue of currency and credit must be restored to the government and reorganized so that the power of the sovereignity of Parliament and of Democracy is safe and secure."

The Liberal party believes that credit is a public utility, not of private ownership, and that the correct concern to the average citizen.

(b) It stands for the immediate cancellation of all debts and the substituted national bank to perform the functions of redundant and unnecessary banks, and to consider in terms of public needs.

essential to the return of prosperity in Canada, and Liberals believe that the extravagant increases in the cost of living are a prime cause of the present depression.

And whereas about 70 per cent of the population of Canada is engaged in the production of commodities such as agriculture, mining, lumbering and fishing, and prices of these commodities have increased far beyond production cost, and as a result our people are crippled that they can't buy what they produce.

And whereas the raising of the tariff walls against trade has not had the effect of protecting our industry, but has rather increased the cost of living.

Therefore it is resolved that the credit is a public utility, not of private ownership, and will be to abolish these tariff increases and to take every step to increase credit.

2. Will promote trade with all nations by exchange of trade agreements with countries having similar in relation to the domestic social and industrial requirements of the people and will help to develop the markets for Canadian products of international commerce and exchange.

On the other side of the pond, Mr. Gowson drew attention to the following resolution introduced in the provincial Liberal platform:

THE PROFOUND OUTLINE

Whereas present financial government by exchange of tariff agreements, arbitrary valuations, cancelling trade treaties and by protectionism, has caused unemployment, thus causing unemployment, freight cars, unbalanced budgets, diminishing incomes and constant price increases.

And whereas there can be no reduction from present financial government by exchange of tariff agreements, arbitrary valuations, cancelling trade treaties and by protectionism, as our markets may again be closed to us.

And whereas in order to effect a re-opening of markets for Alberta products the removal of the general lowering of tariffs and an immediate general lowering of tariffs are imperative.

And whereas a revival of trade is

## Woodsworth Sees No C.C.F. Menace In Stevens Party

MUSHOKA BEACH, Ont., July 9.—"I don't think it would make very much difference to the Co-Operative Commonwealth Federation," J. S. Woodsworth, vacationing here, told Monday in commenting on the new party headed by Hon. H. H. Stevens.

Mr. Dowling, leader of the G.D.P. and member of the House of Commons for Winnipeg North Centre declared on the proposal and placed Mr. Stringer in the field as a straight ticket candidate.

The Stevens point of view on the proposed credit bill was held in 1933, but who felt that in view of the fact that the political picture has changed so greatly since that time the Liberal party of the riding should be given another opportunity to express themselves on the subject.

Mr. Gowson received a tremendous ovation when he rose to speak. Mr. Gowson, who has been a member of the Liberal platform monetary reform committee, was elected to two paramount planks in the Liberal platform monetary reform.

"The Liberal party," he said, "stands for a publicly owned credit system which will under the control of the government regulate the money supply, control production and credit and manage the monetary system in terms of public need. It stands for the standardization of the people and for the further purpose of advancing the economic security of the nation, the economy and the stability of the nation."

GOWSON OVATION

WINNIPEG WRECKED

Continuing, Mr. Gowson declared:

"Hurry once in control will wreck our economy and the control of the issue of currency and credit must be restored to the government and reorganized so that the power of the sovereignity of Parliament and of Democracy is safe and secure."

The Liberal party believes that credit is a public utility, not of private ownership, and that the correct concern to the average citizen.

(b) It stands for the immediate cancellation of all debts and the substituted national bank to perform the functions of redundant and unnecessary banks, and to consider in terms of public needs.

essential to the return of prosperity in Canada, and Liberals believe that the extravagant increases in the cost of living are a prime cause of the present depression.

And whereas the raising of the tariff walls against trade has not had the effect of protecting our industry, but has rather increased the cost of living.

Therefore it is resolved that the credit is a public utility, not of private ownership, and will be to abolish these tariff increases and to take every step to increase credit.

2. Will promote trade with all nations by exchange of tariff agreements with countries having similar in relation to the domestic social and industrial requirements of the people and will help to develop the markets for Canadian products of international commerce and exchange.

And whereas in order to effect a re-opening of markets for Alberta products the removal of the general lowering of tariffs and an immediate general lowering of tariffs are imperative.

And whereas a revival of trade is

## \$1,852,500,000 IS PLEDGED IN STABILIZATION

### SECRET Bankers' Meeting Decides to Act Without Government

LONDON, July 9.—The Daily Herald says today that Montagu Norman, governor of the Bank of England, has pledged \$128,000,000 (about \$185,000,000) toward a stabilization of currency without government agreement.

The money is the privately-owned British exchange equalization fund, to be used, Norman said, "in the support of the pound in the foreign exchange market which shows weakness."

The Bank of England entered into an agreement at Basle, Switzerland, over the weekend "without previous consultation with the treasury or the Bank of England."

The agreement reached at the International Monetary Conference in London is that the governors of all Central banks represented shall join in a communication to the Bank of England to advise the Bank of England as soon as possible.

"It is the Bank of England's opinion that the new party is likely to be successful and that the new party will be able to maintain its position," the Herald said.

Mr. Stevens and myself have been in touch with the new party," he said, "and we have exchanged messages of congratulation and telegrams sending financial contributions from members of the League."

Not only will the new party be supported by the League, but the branch clubs will be formed in every polling division of the country.

Referring to reports Montagu Norman, governor of the Bank of England, has pledged \$128,000,000 (about \$185,000,000) to effect world stabilization, they pointed out that Norman cannot pledge the

## NOTHING NOW BARS ITALY IN CAMPAIGN

### Due See Clear Road From Rome to Addis Ababa

ROME, July 9.—Italy believed last night that path to Addis Ababa, capital of Ethiopia, had been cleared since there was scarcely a possibility of British interference.

Germany is now friendly, they said, and Russia will be friendly toward Italy. France has growing commercial interests in Ethiopia, but Japan apparently has no interest, while both the Chinese and Manchukuoan governments are neutral.

### SCORCHING LEAGUE

There remains only the League of Nations, which has been critical of Italy's actions.

Before that association Italy has been charged with having violated the conditions under which she was permitted to march into Ethiopia.

However, the League should attempt to end its opposition to Italy as soon as possible.

## LOTS OF LUGGAGE SPACE

All Nash cars have a large luggage compartment.

Plenty of room for big bags and suitcases.

Front seat width 52".

Rear seat width 49".

Head clearance, seat to top, 38".

Wheelbase 117".

## JUST ANNOUNCED

## NEW NASH '400' STEPS OUT AHEAD IN COMFORT FEATURES

THIS new Nash '400' is as different from other cars as day from night . . . and every difference is a betterment! The '400' is by far the roomiest car at the price. First car with a Monitor-Sealed Motor. First car to combine an all-steel body with seamless steel top and steel floor. First car to eliminate hood-lifting at gas stations. First car to make available in its price field the performance thrills and operating economy of the Nash American Cruising Gear, optional at slight extra cost. Be sure you drive this 'newest car in years.'

OTHER FEATURES:

AEROFORM SMARTNESS • MONITOR-

SEALED MOTOR • AUTOMATIC CRUISING

GEAR • SUPER-HYDRAULIC BRAKES •

BALANCED WEIGHT • MIDSECTION

SEATING • CLUTCH-PEDAL STARTING

\$1265

And Up.

Subject to Change. Actual Horse Power—Special Equipment Extra.

NASH LEADS THE WORLD IN MOTOR CAR VALUE!

TUESDAY, JULY 9

### IN REVOLT

Hon. H. H. Stevens is to launch a new political group, whose aims, and claims to popular support, will be known when the platform has been put together and announced. The immediate significance is that Mr. Stevens has abandoned hope of succeeding to the Conservative leadership through the retirement of Mr. Bennett, but does not intend to become merely a "lone wolf" in the political desert if he can help it.

Mr. Bennett is not to retire. That has been made plain, and the new political group has made no mention of his failing recovery. There has been no insurrection among his parliamentary followers, seventy or eighty of whom were said a month ago to be almost ready bolt for Stevens.

Since there is no longer any prospect of the leadership falling vacant, Mr. Stevens plans to "steal the party" at the polls, by announcing a program in line with the views of progressive-minded Conservative voters, who have been growing more and more open to their protest against the stand-up men of the Government and the parliamentary contingent.

A revolt in parliament having failed to materialize, he now proposes to essay a revolt in the country among the party rank and file. That he may be successful is quite possible. Stevens' plan has been to head a large body of Conservative members than Mr. Bennett when the voting is over.

### THE THREATS ARE OFF

Definite assurance has been given at Ottawa that the 226,000,000 bushels of wheat held on Government account will not be thrown on the world market at "fire sale" prices.

Readers of the news will know that the international wheat conference opened in London a month ago threats were made, seemingly with some official sanction, that unless Argentina fell in line and agreed to hold wheat Canada and the United States would start a slaughter sale and undersell the rest of the world.

Argentina refused to surrender—but the price-smashing sale is not to take place. The Canadian taxpayer, who would have had to foot the bill, has cause to be thankful the threats are not to be made good.

He would have been gratified to know on whose authority if on any authority, the threats were made. Price-smashing would be a curious method to employ in the interests of "orderly marketing"—and threats to wreck the market would be an equally curious demonstration of the high morality of a Government marketing agency.

### THE POINT AT ISSUE

Explaining where the money would come from to redeem Social Credit certificates, Mr. Abbott suggests a 65 cent tax could be applied progressively on bushels of flour. The farmer would be asked to pay 5 cents a bushel, the miller 10 cents, the baker 20 cents. These taxes would be passed along to the consumer and collected from him by increasing the price of bread one cent a loaf.

Some farmers would be paid for a sack of bread a month, the consumer would be paid for a sack of the game if he had to buy nothing but bread and get \$25 a month as a basic dividend. But there would have to be a corresponding levy on all other consumers, and the point in the process would be handling, which would in turn be passed along to the consumer. Would the aggregate taxation demanded of the latter amount to more than his \$25 dividend?

That is the point that has to be determined to find out whether he would be better or worse off. In fact, that is probably what would be necessary by expert accountants. But until that is determined it can only guess-work how the consumer would fare, and he seems to be the party upon whom the levies would fall.

A fact to be remembered is that the consumer were called upon to pay out more than he is paying at present plus the amount of his dividend, he would have to buy less than he now does. He will pay exactly the same as at present, plus his basic needs, but his basic food would be any better off. Once off, his necessary expenses were less than his present expenditure plus dividend would be benefit.

The time to make certain how the consumer would be affected is before a Social Credit system is adopted, not after, for "the consumer" means everybody.

### THE LEAGUE IN PERIL.

Mussolini threatens to wreck the League of Nations if Germany "meddles" in its affairs with Abyssinia. Italy, he says, will in that event withdraw from the League, and it is commonly agreed that with Italy out the League would not be representative enough to wield any world influence in world affairs.

The other side of the case is, if the League must not "meddle" with Germany or Japan or Italy, of what use is it? If one, or three, powerful nations can't do the League to mind to do what they feel so distinctly, will the first rate powers do the same? And the League would have to accept the position of arbitrator only among nations too weak to defend its authority.

The League has the same right as Germany to step out of the League if it wants to, and to lay down the terms upon which it will stay in. The fact that in two cases this right has been exercised, and that a third nation threatens to do the same thing, does not promise well for the future of the League—or even that it will survive.

Perhaps what is needed is a reorganization of the League from the ground up. It was founded on the assumption that strong nations would submit to its advice, and that weaker ones would have it. The former assumption is crumbling, and the latter is not worth continuing in its absence.

People might call a conference to find out what kind of a League the great powers want or would actually support, since the outlook is that the present one must either do nothing or collapse.

### Forty Years Ago

From the Files of The Edmonton Bulletin

According to the Wall Street News "there are now 200,000 families in Canada, each with a single inhabitant, to whom the shelves of their deserted villages" is. It is said that Saratoga, one of these deserted villages, has a \$30,000 opera house, a large brick hotel, a \$50,000 school house and a number of fine houses, but that nobody claims a place to sleep. All this came about by booming on borrowed capital without resources enough to pay the interest. People moved away from these towns as a new way of paying old debts.

Mounds Etna and Vesuvius are in eruption.

F. J. Dunn, a Winnipeg restaurant keeper, was fined for breaking his premises in a fitful temper tantrum. Pussey cat sausages were a feature of the business.

John Lineham, M.L.A. for High River, arrived on Monday.

The "refrigerator" car that came in on Monday will be built in it and the temperature remained at 40 degrees.

Prince Bros. of Battisford arrived last week to take down rails of lumber.

W. B. Davis arrived from Beaver Lake.

Mr. Marker, government creamery inspector, went south on last train.

### THIRTY YEARS AGO

The C.P.R. has taken over the E. and N. railway on Vancouver Island.

D. D. Mann announced in Winnipeg that the Canadian Pacific will reach Edmonton in three months.

Mr. and Mrs. Hugh McKey leave on Tuesday on a trip to Scotland.

Mr. A. Campbell of the Dowling mill informed his workers there are about 500 acres of fall wheat to be harvested in the Edmonton district this year.

Constandinople: The Turkish council of war decided to send all warships to the mouth of the Bosphorus and to fortify the entrance heavily, owing to strained relations with Russia.

The population of Chicago is given as 2,372,760.

Medicine Hat is to be the headquarters of the Saskatchewan Horse.

### TWENTY YEARS AGO

Fifty five hundred men are now employed in building the A. and G.W. and the E.D. and B.C. railroads.

D. A. Thomas, the Welsh coal king, is sending a drilling outfit into the north to search for oil.

Nearly 500 guests attended the opening of the new Macdonald hotel last evening.

Glenrose: Frank Hall, who attempted to assassinate P. M. Martin and bombed the reception room of the Canadian Club, has committed suicide by jumping from a jail window.

London: Under the D.R.A. the Government will take over control of the sale of liquor in Great Britain for the duration of the war.

Montreal: Seven thousand men, including, and believed to be, the result of an explosion that wrecked the munitions factory at Beloeil

### Poems That Live

#### THUNDERSTORMS

My mind has thunderstorms,  
That break for heavy hours:  
Until they rain me words;  
My thoughts are dropping flowers  
And silent, stoned birds.

Yet come, dark thunderstorms;  
And break your heavy hours;  
For when you rain me words,  
My thoughts are dancing flowers  
And joyful singing birds.

—William Henry Davies.

Speaking at Saskatoon five years ago this June, Mr. Bennett outlined his election platform. "No doubt," he said, "you'll charge I have had no stronger indictment to make against the government than that held power for nine months. That is one of the principal counts in the indictment, and I think, if you will, the indictment of the people without food or clothing in adequate quantities." What then is the indictment against Mr. Bennett's own government? Or does he say now that unemployment is not the fault of governments at all? —Toronto Star.

### The Passing Show

By J. S. COUPER

Is it a sign of the times that so many enquiries are being made about the art of happiness?

An English newspaper offered prizes for descriptions of the happiest people on earth.

Here are the four winning descriptions:

"A craftsman or artist whistling over a job he's done."

"A mother, after a busy day, bathing her baby."

"A doctor who has finished a difficult and dangerous operation and saved a human life."

Liddell-Hart, the biographer of Lawrence of Arabia, was once asked, "Are you happy?"

"A mother, after a busy day, bathing her baby."

"A doctor who has finished a difficult and dangerous operation and saved a human life."

Says John Cooper Powys: "While pleasure is something that comes to you from outside, happiness is something it is. It is intrinsically a mental, or even a moral state."

There's comfort in knowing that happiness doesn't depend on riches or rank. It springs from the heart, not the purse.

The other day, while I was walking along the Strand, I met a woman who was evidently well off, and she stopped to talk to me.

"I'm not happy," she said, "but I'm not unhappy."

I asked her what she meant by that.

"I'm not unhappy," she said, "but I'm not happy."

It is a sign of the times that so many

### More About The Power Of Suggestion

By DOCTOR FRANK MCCOY

In yesterday's article I explained something

of the way in which the unconscious mind

works and how it is influenced by suggestions

or commands sent to it by the conscious mind.

The conscious is the reasoning mind and the unconscious is the memory-mind and the mind

which directs the action of the organs of the body.

The conscious mind is the general who gives the orders or commands and the unconscious mind is the general who obeys them, carrying them out, obeying to the exact letter what it is told to do.

The common soldier does not have the right to ask about anything.

A good example of this is the case of a

retired sailor who argued with his commanding officer.

He follows the command exactly as far as his strength will permit.

The unconscious mind does no more reasoning than the soldier.

It only follows instructions and carries them out completely.

The conscious mind is the general. Yes,

the conscious mind is the general who gives the commands to the soldier in the unconscious.

You have no conception of the ability of your unconscious mind in accomplishing results.

You have no idea of what the thought processes are that go on in the unconscious.

It is the unconscious who has the ability to do.

You must understand that thinking is going on constantly in your unconscious whether you are awake or asleep.

This thought activity can be eliminated by direct suggestion.

Control your unconscious mind.

Control your unconscious mind by controlling the instructions coming down from the conscious.

You can learn to make your conscious work for you.

Begin by telling yourself you can use these powerful forces to help you.

Present a command to the soldiers of your unconscious and they believe it. They have no other way of doing it.

The unconscious does not have the kind of mind which can argue or reason.

It is the conscious which follows the commands of the unconscious.

Control your unconscious mind by controlling the unconscious.

It takes a command and tries to make good.

In suggesting any command to the unconscious it is advisable to repeat it over and over again.

Keep on feeding the unconscious with good suggestions and you will gain certain good results from them whether you understand them or not.

You may not understand how these suggestions work through influencing the unconscious.

But you can see the results.

Count the results.

If you repeat over and over again certain words and give your unconscious mind strong positive suggestions, you will surely get results.

# UPSWING OF BUSINESS LAGS FOR SPENDING

**Continued from Page One**  
 course of business is controlled by economic events, financial. To be specific, a group of men tell you that business has declined because of the inflation scare precipitated by the Palms bill. Yet when the Thomas inflationary threat in 1933 visited the rest of the country, Congress did not say it is to be attributed to the long session of Congress filled with frightening bills and the stubborn persistence of the Senate in its endless debate over the bill. The same year, however, was rising more November, 1933, to June, 1934. Congress was in session and the Senate was talking quite as volubly, and the bills were supposed to be even more disturbing.

The most persistent criticism is that the Federal Reserve Bank Bill, the Utilities Holding Company Bill, and the eventual ending of NRA have had a much more important influence in business. Last year they were doing the Stock Exchange Bill, the Securities Act, and the Glass Steagall. They were doing the same thing. Yet all these things have not paralyzed the economy. The Senate has been tended to its knitting and gone ahead making cars.

## CREDIBILITY FEARS SCOUTED

I do not think there is any truth in many of these claims. As for NRA, the NRA itself did not start until May. After the NRA was passed, it became unconstitutional, though I do not know if that had anything to do with the little that was done with it.

As for the Banking Act and the Utilities Holding Company Bill, I feel quite sure that uncertainty has resulted from these proposed from the first, long campaign, starting power and utilities. One of the most foolish proposals ever made by Congress, these last two years, was to be the wild, boisterous cries of distress that have plagued every proposal. It has caused every proposal to be held up for dealing with our national problems. We have been told that the Federal Reserve Act would not destroy the banks. Now the same men who said that have now said that the Federal Reserve Act will not destroy the banks. This is why the chains must be taken off the Canadian National Railway system. We do not have to consult any outside nation, or "explore possible avenues" of trade. We have supplies of coal sufficient for thousands of years, locked up in the ground by the railway and an intercontinental lumber trade which has been strangled by offering railway space for sale at prices which cannot be paid.

Just common sense and common honesty will make the Canadian National a way along which to carry prosperity to every community in Canada.

This real government spending was about \$200 million in the first half of last year than this year.

## WHY NO RECOVERY IN BUSINESS INDUSTRY?

The fall of the foreign trade and the sluggishness of the building industry furnish the other factors which have contributed to the present depression. This is not a barrier to any new financing which is not real credit.

The issues are important for one thing. They make it difficult to plan that the Securities Act, the Banking Act, and the new NRA will bring us a better deal.

There is no real answer to this self-imposed isolationism. The world market is too small to support us.

Every business which gives employment also produces and distributes purchasing power — through the wages it pays, through the taxes it pays out to produce goods. Roughly, industry may be divided into two great classes: those which buy consumers' goods (the things bought directly by consumers) and those which buy producers' goods (buildings, roads, heavy machinery, etc.). All of the people engaged in both these industries are buying goods. If then, the capital goods industry breaks down, then all the people engaged in the production of work can no longer buy goods from the consumer's industry. The same is true of the capital goods industry are not bought by consumers, but chiefly by producers of fixed capital, such as machinery, credit. This is the heart of the importance of the capital goods industry in the present depression. Obviously that most of the income which it produces is available for the purchase of raw materials. Therefore this reason the capital goods industry are regarded as producers of fixed capital, whose money income or purchasing power.

## THREE PROBLEMS OF PURCHASING POWER

The three great producers of these fresh supplies of purchasing power are the Government, foreign trade, and government expenditures.

We are almost all the movements in the last two and a half years to the influence of these three forces. At one time, the initial public offering of July, 1933, which was unique, began to pick up, definitely under the New Deal, in the early part of 1933. This has been the single most powerful factor in the business upturn.

Why did business decline from the end of January of last year to the end of June? Why did it not improve a little, although all that it should have been getting better?

The explanation is that business is now not wholly at the mercy of seasonal influences. Government spending and policies have been enhanced and these collaborate with the other two factors as a factor of business. Therefore we need not be surprised if we find business continuing to get better in the seasonal pattern.

A rough estimate of government spending shows that the sum of this year compared with the first half of last year will reveal that it was for the first half of last year. The much less is not easy to say. Government emergency outlays in the first half of last year were \$1,000,000,000 in the first half of this year were \$1,000,000,000. Here, again, there is a billion dollars in favor of last year. This is subject to modifications, but it is a rough estimate. In both these periods ought to be deducted the amounts attributed to the Second World War Corporation because these outlays were not all expenditure, but chiefly lending. However, the amount of money we were to enable the lenders to spend as the loans to the railroads for equipment, etc. But in spite of all

## Unshackle The Canadian National Railways

By R. T. ELLIOTT, K.C.

Since 1857 there has been no increase of population in Canada which account is taken of the number of Canadian births in the period since the Dominion Day. We have been raising young Canadians for export. This is the most ruinous policy which can be followed.

The first duty of every government, as well Federal as Provincial and Municipal, is to give to all Canadians most favored nation treatment in Canada.

In order to get in line for performance of this duty, there must be a complete abandonment of charging every Canadian a little extra for everything because he lives in Canada, and of living in Canada a little less for his work because he is living in Canada.

This will take money, and the only present day method available to get this money is to put the Canadian National Railway system to work. The gigantic investment has been made, and the nation owns a railway system which in power to move heavy traffic is second to none in the world. The need is that early and often. Ottawa politicians undermine public confidence by claiming that the railway problem is both serious and dangerous. There is no railway problem, but there is a destructive political problem which has been built up around the Canadian National Railway system in shackles.

This has given rise to many ridiculous theories of creating transportation factors and many more in order to sustain the system which cannot be paid, thereby leaving the natural products in the ground, and creating a second traffic destroying factor. Wiping out these two traffic destroying factors root and branch will make the Canadian National Railway system a great national utility and a real money-maker instead of a deficit breeder. The railroads are tightly chained up, though it was a natural result of the railway system which was attached to the Canadian government. One of the worst rains of the century, measured 40 years following.

## CRAZIES OVERFLOW

These have been already overflowed after prolonged rains, overran their banks, with much damage to property and to the railway system.

The bridge north of the railway, three and one-half miles west of town, was washed away by the swollen high water, leaving the farm of Mrs. G. Bradford and her son, Mr. G. Bradford, cut off from town as far as vehicular traffic was concerned. The bridge was washed away by the swollen creek, but is only safe for pedestrains in its present condition.

## HIGHWAY

A swiftest flood has filled the cut on the Jasper highway two miles east of town when the culvert gave way. The swollen waters quickly subside and little damage was done to the highway.

The lake has overflowed carrying half a mile west is partly caved in, and the roadway has been unsafe for travel, and traffic from section must detour a mile east to get to town.

The lake has overflowed the shoreline in spots and old timers here say that they have never seen such a lake as this during a residence of 25 years.

## STORM, FLOOD SET RECORDS AT WILDWOOD

Lightning Bolt Crashes Home of H. A. Martin —None Hurt

WILDWOOD, July 9.—Lightning struck the home of H. A. Martin, 101st Street, during a terrific storm of tropical intensity over the western prairie, which climaxed a week of almost continuous rain.

A bolt smashed into the home of Mr. and Mrs. H. A. Martin on Saturday night, fusing some switches and blowing out a window and tearing a hole in one running pipe, striking along a clothesline of wire, burying itself in the earth to which one end of the metal pipe line was attached.

One of the worst rains of the century, measured 40 years following.

## ONE MAN'S TRUTH

This has given rise to many ridiculous theories of creating transportation factors and many more in order to sustain the system which cannot be paid, thereby leaving the natural products in the ground, and creating a second traffic destroying factor. Wiping out these two traffic destroying factors root and branch will make the Canadian National Railway system a great national utility and a real money-maker instead of a deficit breeder. The railroads are tightly chained up, though it was a natural result of the railway system which was attached to the Canadian government. One of the worst rains of the century, measured 40 years following.

## THE RAILROADS

A swiftest flood has filled the cut on the Jasper highway two miles east of town when the culvert gave way. The swollen waters quickly subside and little damage was done to the highway.

The lake has overflowed carrying half a mile west is partly caved in, and the roadway has been unsafe for travel, and traffic from section must detour a mile east to get to town.

The lake has overflowed the shoreline in spots and old timers here say that they have never seen such a lake as this during a residence of 25 years.

## MYSTERY VEILS CLERICS' FATE AS QUAKE HITS

Continued from Page 1

It is chiefly for extending old issues — extensions of old past-due notes — exchange of securities, etc. Only \$149,137.83 for the investment of the year.

The issues are important for one thing. They make it difficult to plan that the Securities Act, the Banking Act, and the new NRA will bring us a better deal.

There is no real answer to this self-imposed isolationism. The world market is too small to support us.

## TURN CANNIBALISTIC

The idea is that on the last day of the month the Federal Reserve Bank manager will be sent to him with a bill for the amount of his loan.

Nobody knows that, but every pilgrim knows that when he comes to town he gets a good meal.

Locally grown vegetables, fruit, bananas, etc., are still available. The local market is still open.

Oranges, Spanish-Sweet and Valencia, are still available. Some are \$1.00 per pound, others \$1.25 per pound.

Lettuce—Local.

Carrots and Cress 2 lbs. 25c

New Cabbage—B.C.

Broccoli and Cress 2 lbs. 17c

Locally grown

Carrots—Local

Bananas—Local

Apples—Local

Fresh Meats

Chicken—Local

Meatless Beef—2 lbs. 15c

Oven Roast, Chops

Shoulder Steak—2 lbs. 15c

## MONDAY'S NEWS

They are here to stay. The weather is terrible, but the weather is terrible.

They are here to stay.

# U.S. Wealth Tax Plans Stiff Levies

## Demand for Solvency Is Congress Cry

**Democrats Refuse To Be Rubber Stamp Law Makers**

WASHINGTON, July 9.—Republican demands for "national solvency" and Democratic opposition to it are not "rubber stamps" for the president, started running in the press yesterday. On Monday a tax bill estimated to raise anything from \$118,000,000 to \$901,500,000 was introduced.

Henry Morgenthau, secretary of the treasury, supplied the initial plan, and the Senate's ways and means committee estimates of what would be produced by the bill were referred to individual and corporation incomes and to inheritances and gifts. The White House said that the levies had been estimated yesterday they should be the limit of the session's tax bill.

### DRAW UPON WEALTH

In all 20 committees schedules were returned to the group with requests for more time, and the comment from Morgenthau that "they are devoted to getting on an account with the Senate" seems which for the most part have been derived from nation-wide activities.

The Senate's estimate of tax income between \$100,000 and \$150,000 at 38 per cent as compared with the House's estimate of over \$75,000,000 at 84 per cent against the present \$3 per cent.

The highest would be 63 per cent, the lowest 40 per cent and increase to 94 per cent on incomes over \$10,000,000.

### INHERITANCE LEVIES

Corporation inheritance levies were within a range of 10 per cent on those under \$2,000 to 17½ per cent on those over \$10,000,000 against the present flat of 13½ per cent.

The stiffest inheritance levies would fall on the oil industry, with an estimate of \$100,000-\$60,000 to 424 per cent on \$10,000,000 plus.

The mildest would be 63 per cent and mount to 37 per cent on all over \$10,000,000.

### Supper-Liner To Be Built For C.P.R. Service

LONDON, July 9.—Sir Frank Besty, president of the Canadian Pacific Railway Company, said before sailing from Southampton Sunday, a sister-ship for the Empress of Canada will be built.

"We shall need a new liner of the same type as the Empress of Canada to give a balanced service."

He added that the order would be placed in Canada, after withdrawal from service of the Empress of Australia and the question of replacing her.

The liner will probably come up within the next five years.

### We Shall Need a New Line

CHICAGO, July 9.—Application for the Reconstruction Finance Corporation for a loan not to exceed \$100,000,000 to finance the reorganization of the Rosebud Coal Company, elevator in the United States and now undergoing reorganization, was authorized yesterday by Federal Judge William H. Homan.

### Big Grain Loan Now Authorized

CHICAGO, July 9.—Application for the Reconstruction Finance Corporation for a loan not to exceed \$100,000,000 to finance the reorganization of the Rosebud Coal Company, elevator in the United States and now undergoing reorganization, was authorized yesterday by Federal Judge William H. Homan.

## Opposition From Councillors Who Hoist Proposal

### INVESTIGATION NORTH FLOODS IS ANNOUNCED

#### Water-Power Engineer is Empowered to Take State's Right

Immediate investigation will be instituted by a water power engineer to determine what action can be taken to prevent obstruction of the Slave River and other recessional floods in the north country.

Mr. W. H. Reid announced on Tuesday:

"This question is now a thorough complete investigation," he declared.

The Premier declared that "we have engaged in a survey in association with Dominion government representatives in the north country."

He had a partial investigation by

Homer P. Keith, deputy minister of public works, and the north water chairmen of the Irrigation Council. In addition, a Dominion government engineer has been investigating.

"Now we have decided to set up our own water power engineer to see if anything can be done to remove obstacles from the Slave river and other recessional flood situations. He will remain there as long as necessary to make his investigations and take such action as necessary."

The floods in the north have been the most serious in years, carrying out steel and wooden bridges, rendering roads impassable and halting railway communication. Many residents have been flooded out, although the government has provided to preclude hardship.

Food supplies have been available and the services of a district nurse.

**ALBERTA TOWNS VOTE FRANCHISE TO POWER GROUP**

Rimbey and Bentley will shortly join the Alberta towns and villages already enjoying the benefits of electric light and power.

Votes taken at two places on Monday indicated the advisability of entering into agreements with the Calgary Power Company resulting in the franchise being granted in favor of granting the necessary franchises. Rimbey voted to 0 for the franchise, while Bentley to 0 for the franchise. The franchise voting a tie of 73 to favor one against.

The agreement calls for a ten-year franchise and work will start immediately making power and available to Bentley and Rimbey about October 1.

**Mayor Complains Of Stadium Fund**

Anxious to have improvements made at the Edmonton Stadium as soon as possible, Mayor J. A. Clarke complained Tuesday that although city council had authorized an expenditure of about \$12,000 for the stadium, nothing had been done since last summer.

The mayor said the work on the fencing, as this project had been hanging fire for a lengthy period, had been discontinued because officials concerned had not carried out the instructions of council by starting this job," the mayor stated.

**New Canadians Favor Liberals**

Social credit candidates in the provincial election have won the province who has nothing to lose and everything to gain," but the Liberal party in addition to all its new ideals, will be the choice of the new Canadians, Mr. G. C. Goodman.

A prominent Ukrainian who came to Canada from a country where his people were persecuted, had said:

"During the war, a Conservative government put many of the New Canadians in camps. They have not forgotten it. In fact they will never forget it just as their fathers passed the story down to them."

"Liberal administration has always been a friend to us. We are fully confident in the ability of the Liberal party to help us," said this Ukrainian spokesman.

### ROAD REPORT

Roads were generally rough in the northern half of the province of Alberta, according to the A.M.A. road report. Jasper and Peace River roads, the former due to construction work and latter after heavy rains.

A detailed report follows: Edmonton-Jasper, very bad, cars have to be pulled out of mud holes; St. Paul, rough; Two Hills and St. Paul, light rain is a problem; Fort Macleod, muddy; Edmonton-Lloydminster, rough; Edmonton-Wainwright, rough; Edmonton-Highwood, rough; Edmonton-Provoost, rough; Edmonton-Victoria, rough; Edmonton-Muirhurst, heavy rain at present, road mud; Edmonton-Cherhill, muddy.

**Ex-U.F.A. Chief And Brownlee's Counsel In City**

Herbert Greenfield, ex-chairman of United Farmers of Alberta, arrived in Edmonton from Calgary Tuesday with M. M. Porter, legal counsel, and a stay at the MacDonald hotel.

He was on his mission to the city, Mr. Greenfield was it was said to be well received.

"I have been out of politics for a number of years," he said. "No one I plan to meet any day of the U.F.A. leaders here during my visit."

**When a train from the suburbs of Paris is late, officials give out political excuse, but what about that adjustments in future would be harder to get?"**

No workers' compensation laws are in force in South Carolina, Arkansas, Mississippi nor Florida.

**Obstruction Ensues In Long Session — Mayor Deplores Delay in Proceeding Work.**

Meeting considerable opposition from councillors Monday night, Mayor Joseph A. Clarke's plan to make relief caps self-supporting by putting them to work at wages of 50 cents per hour was defeated as the council chamber was adjourned. The proposal to be made was to hold a special meeting of city council at 3 p.m. Saturday to further consider the matter.

In his opinion, the question of relief caps was one which must be decided by commissioners as long as additional financial support is not required, averred Jas. Easton.

**NEW POLICY**

This is the new policy and the proposal will stand by the whole council, Mayor Clarke.

With the exception of the proposed project over the relief work now in force, Ald. R. V. Smith wanted to have work requirements for their labor being set aside for relief work.

While he favored the jobs being put to work on useful projects, he did not want to have the city if it was planned to carry out an isolated project a general program such as a scheme was also impossible.

**WORLD'S FAIR VALUE**

The idea behind his plan was to have relief caps self-supporting for the months ahead, the mayor explained the mayor. He referred to the fact that the proposed project delayed until it was proposed to use 500 men for relief work.

He would support the finding money for supervision, tools and equipment, he said.

Certified the amount earned by relief caps would be higher than just a subsistence level, if the men were expected to work longer than the 40 hours a week.

Thousands of unemployed were given a chance to earn money under their own plan, Mayor Clarke.

The United States declared that relief caps had been set aside to put relief cases to work.

**COSTS MORE**

City Engineer A. W. Haddow, referring to the suggested relief cap, said that the cost of relief caps would be at least a cost of \$200,000 per month.

Mr. H. W. Bentler, 70, of the engineering department, said the cost to him would be higher than a subsistence level, if the men were expected to work longer than the 40 hours a week.

Mr. J. W. Fry remained communicating with the employment office, he said, to get relief cases to work on city projects. He felt that the suggestion of the relief caps under the proposed program was too limited to be successful.

He would support the finding money for supervision, tools and equipment, he said.

Certified the amount earned by relief caps would be higher than just a subsistence level, if the men were expected to work longer than the 40 hours a week.

The estimated cost of relief caps now is Aug. 10. Advance "dope" on the dates from Aug. 12 to Aug. 14, a most desirable day except that nomination day would be on Sunday if this is "out."

Mr. Bentler said he would be at the election on Sunday, Aug. 15.

Mr. Bentler, 70, of the engineering department, said the cost to him would be higher than a subsistence level, if the men were going to be paid in cash, he said.

**WANT CASH?**

Speaking for the Unemployed Marine Men's Association, J. McPhee said: "I am in favour of relief caps, but we want an amount which would provide more than just a subsistence level." We are going to go out for just a relief voucher," he stated.

Mr. McPhee said the nomination given to his plan, Major Clarke declared his scheme would be 75 per cent of the cost of relief caps, if they would be more satisfied than many of those with regular jobs.

**Police Court**

The battle of Ding Hill was fought in police court Tuesday when 15-year-old Charles Norfolk of Edmonton charged Charles Norfolk of assaulting him with a hoe and breaking his nose.

Norfolk denied the charge, stating the boy attacked him with a hoe and the boy hit him with a rock from the ground, from the boy's hand, throwing him to the ground. He had then picked up the boy and hit him again, the magistrate said, and fined him \$1.50.

Norfolk denied the charge, stating the boy attacked him with a hoe and the boy hit him with a rock from the ground, from the boy's hand, throwing him to the ground. He had then picked up the boy and hit him again, the magistrate said, and fined him \$1.50.

Mr. C. E. Clarke, magistrate, said:

"I figure you took a rock and threw it at him. You took a hoe and hit him with it. That's what I think happened."

Mr. C. E. Clarke, magistrate, said:

"I figure you took a rock and threw it at him. You took a hoe and hit him with it. That's what I think happened."

Mr. C. E. Clarke, magistrate, said:

THE DEAD MARCH

# Squatters Flee Before Flood Peril

**FLIMSY TOWNS  
NEAR DAM ARE  
UNDER WATER**

**Montana Soldiers Sent to  
Warn Inhabitants Who  
Abandon Homes**

**FORT PECK, Mont.** July 9—Four "gumboot" towns of ordinarily dry "Gulf Coast," near the \$7,000,000 Fort Peck Dam, were partially under water last night. Their several hundred residents were safe, warned a few minutes before flood came.

A torrent described as 100 feet wide and four feet deep rolled down the cut bank of a rain-storm below the site of the dam and about 10 miles from the unincorporated town of Midway Park. Grove New Deal and Parkdale Apartments, which had awoken sleeping residents of the tiny small "settled" towns and those from the bottom of the surrounding hills. The towns were occupied by Fort Peck workmen and their families.

**BISLEY SHOTS  
GETTING ACTION**

**BISLEY CAMP, England**, July 9—The King's Own Royal Dragoon Guards and Guards Sappers of the Royal Navy, an old hand at Bisley, each scored points in the King's Cup competition, one of the principal features at the National Rifle Association's empire meeting.

Only the first Camp entered the Bisley and the B.S.A., the only other open event on the second day of the competition.

The Bisley and the King's Own Royal Dragoon Guards, with 100 points, were best of the Canadian teams.

The Bisley and the King's Own Royal Dragoon Guards, with 100 points, were best of the Canadian teams.

Sgt. C. Iddiots, of Calgary, scored 30 in the Bisley and 33 in the King's Cup.

Lieut. G. H. D. Pye, of the Royal Artillery, Toronto, 28; Const. Alan Parwell, Verdun, Que., 28; Capt. A. G. C. McLean, Victoria, and Lieut. Neal Dow, Saint John, 23.

Lieut. Boa also headed the Canadians, with 27. Captain J. M. Conner, with 33 of a possible 33, Conner had 31, Dow and Pye, 30; Iddiots, 29; Trainer, 28; and Deneil, 24.

## O.C. CRICKET

**LONDON, July 9.**—Altered by superb bombing Sussex overcame Gloucestershire, 100 to 90, yesterday, and Monday, to improve its standing in the English County cricket competition.

Gloucestershire 29 and 27, Sussex 42 and 33 for three, were defeated at Hove.

Northamptonshire 150 and 145; Essex 40 and 112 for three; at Colchester.

Leicestershire 100 and 101; three, Notts 265; at Tadcaster.

Middlesex 100 and 100; three, Derbyshire 227 and 101 for nine; Lancashire 100 and 100; three, no visitors at Buxton.

Worcestershire 150 and 150; three, Somerset 101; three.

Warwickshire 100 and 100; three, Nottingham 206 and 100 for three; Shropshire 140; Leicestershire 130; at Newbury.

Norfolk 100; three, South Africa 420 and 200 (Wade 100 not out); Nottingham.

No vehicle of any sort is permitted on the Oviodor, the Fifth Avenue of Rio de Janeiro.

## Love Laughs At Phobic Prison

GRACE GOLDEN

When William Ellery Leonard, well-known poet and professor of English at the University of Wisconsin, takes his third bride, Miss Grace Golden, 23 years his junior, will virtually forsake the world to follow him to Madison, Wis., where he has been teaching since 1934. Professor Leonard, suffering from distant relatives, is seized with hysteria if he walks beyond a few blocks of his own apartment in Madison. Miss Golden met her fiance while attending the University of Wisconsin.

PROFESSOR LEONARD

## U.S. MINIMUM WHEAT FIXED AT 33 CENTS

### Benefit Payment Decrease Four Cents Over 1934 Figure

**WASHINGTON, July 9.**—A proclamation fixing the minimum 1935 wheat benefit payments at 33 cents was issued yesterday by Henry Wallace, United States secretary of agriculture.

The new payments on this year's crop will be an increase of six cents over the minimum of 29 cents fixed by the 1934 Agricultural Adjustment Act.

The agricultural adjustment administration has estimated that additional income to producers of approximately \$1,400,000 will be given to wheat farmers at the 33 cent rate on the 1935 crop should harvest be normal. This compares with approximately \$1,000,000 which would have been paid at the 29 cent rate on the 1934 crop. On the first program in 1933 was 28 cents.

In the same change was made in the previous cash rate of 30 cents a bushel for the 1934 crop. The new rates through tax collections on wheat produced by farmers not under contract, compare with sufficient funds now are available to meet the increase.

### Lloydminster Club Takes Soccer Game From Thomasville

**LLOYDMINSTER, July 9.**—Foot-ball is again taking a hold in Lloydminster and the local team defeated Thomasville, 6 to 2, yesterday.

The visitors' goal was scored in the 20th minute by a German, and the home team, which had a sort of early lead, was taken off guard.

Gratuitous. There was anything she wanted. At a negative shake of the head, the maid would say, "I'll do it down below." And then, to kill time, she would sit down beside the girl.

Zoe, won't you talk about it? I would help myself, she said, body so soft that her face was again buried in the pillow.

"Leave me alone. Oh, I'm dying to know what it is. The world is full of secrets, I know. But you don't know who she is and I need to know."

Reverend Charlie Cobbler:

"Zoe, how now? What would they do?"

The key graded in the lock. Dr. Kaye stood in the doorway. Zoe's face, framed in the arms of the maid, was pale, but she was again buried in the pillow.

"Leave me alone, quickly," grunted the doctor. Katherine never knew how they got through the confusion between the two girls, but she was removed and prosperity restored.

All of these are covered in the book, "How to Make Money in the Home," which can be purchased at Ottawa having the same policies and the same changes.

**ALBERTA TURNED OVER**

The provinces of Nova Scotia, Ontario, Quebec, Manitoba and British Columbia have all realized this and during the last few months turned over their financial systems. Six days ago declared itself in an uncertain terms and I have no doubt that the people of Alberta will follow the example of the Albertans that this province also when our government gives us the opportunity to do so, we will do so, of progress and relief of our money.

Mr. Houston then turned his attention specifically to the subject of monetary reform and in giving some facts on the subject.

### MONEY PLAN FAILS

Education, by improving the practical and commercial advantage for all men, will bring about an ever increasing demand for all manner of goods and services.

Our monetary system, while eliminating the need for human wage-earning energy, has created a monetary system, which is farce strained and which is dead.

And there was a nurse with dark hair.

"Leave me alone, quickly," wailed Zoe's mother. Katherine said something about Zoe's desperate need.

John Kaye's prescription, though containing medicine, that's all, Katherine said, trying to make the sound speechless.

"Leave me alone, quickly," said Kaye.

John Kaye, do you think I'm crazy?"

Terror, looked out of the window.

"Leave me alone, quickly," said Kaye.

# CANADIANS TRAIL FAR BACK IN SENIORS' MEET

**One Halved Match  
All Canucks Able  
To Get First Day**

**SAFEWAYS LOSE  
AT VEGREVILLE**

VEGREVILLE, July 9.—Vegreville easily defeated the Edmonton Safeways nine, 8-2, in favor of the locals. The visitors got their lone two terrors in the second inning, but the home team's eight of that stanza never came up in the running. Letty Mylinski, for the hosts, had a hit and 12 of the visitors. The locals played well, gaining four the past week and won six of the seven.

**British Golfers Do Not  
Drop Single Point As  
Play Opens**

PRESTWICH, July 9.—One halved match out of 12 played was the best the Canadians could do as the Senior Golfers' International tournament with Great Britain and the United States opened Monday.

The Britons did not drop a point and the U.S. seniors gained all their at the expense of the Canadians. The standing last night, at the halfway mark of the tournament, was Great Britain, 12; U.S., 5½; Canada, 1.

Canada's half-point was gained when George Robinson of Toronto held off the British attack on the green on the 18th hole, halving the match between himself, R. M. Gray of Victoria, and the Canadian Douglas of the United States. Robinson, captain of the Canadian team, said his first round was the Canadian's first experience in foursomes play as distinct from his half-point in the singles.

**LOCAL MAN UNLUCKY**

John I. Rankin of Montreal and E. N. Kennedy of Edmonton were one of the two teams to win their match with B. Darwin and R. Blair in the morning.

Canada's half-point at the 11th and this seemed to unsettle the Canadians who lost at the 16th. The same pair of Britons won again, a half with G. Curtis and M. Peary, in the afternoon.

J. A. Lewis of New Westminster, B.C., and James Ogilvie of Brampton, Ont., were three down at the turn, but won the next four, a half with G. Curtis and Dr. H. H. McLean of the British team, and the last 12th at 13th.

**BRITAIN CANADA**

J. Pease and H. Decante def. R. M. Gray and G. Robinson, Toronto; F. J. Taylor, A. Martin, C. Caputo, S. Lyons, and T. Dr. H. H. McLean, Brampton, Ont., won their match with R. Blair and R. McLean of the British team.

B. Darwin and R. Blair def. John G. Curtis and M. Peary, Victoria, 4 and 3.

R. Blair and Dr. H. H. McLean, Brampton, 4 and 3.

**U.S.—CANADA**

F. J. Taylor, Vinay Douglas halved with Gray and Robinson. J. Pease and H. Decante, and J. Lyons and P. Curtis, both won their matches.

G. Curtis and M. Peary def. John G. Curtis and M. Peary, Victoria, 4 and 3.

H. Decante and J. Crum def. A. W. McLean and Dr. H. H. McLean, Brampton, 4 and 3.

**Second - Guessers Say  
Frank Frisch All Wet**

By ALAN GOULD

CLEVELAND, July 8.—Frankie Frisch, non-playing pitcher of the National League All-Stars, was the victim of second-guessing last night in the camp of the losers, all because Frankie's last minute pitch to the home team's belated switch by Mickey Cochrane, leader of the Americans did.

Frisch sharply defended his decision. Letty Mylinski, owner of his own team, the All-Stars, started his career with the ace of the New York Giants, but National Leaguers—including a number of the All-Stars—felt it was a mistake and that the result might have been different with "Prince Hal" doing his "sinker ball" stuff from the outset.

Tom Jones, giving the starting assignment in a surprise move just as the All-Stars had been given a game to play, was the victim of the All-Star beat for the third straight year. The Yankee first sacker is at the foot of the batless class in the annual frolic but he had the distinction of being the only one to score a run in the first game, another long fly ball in the huge Cleveland stadium but it travelled fully 450 feet to the running track in deep right centre, where Joe Moon dropped it down on the gallop.

There were no vials for big Hank Greenberg, Detroit's great Jewish first baseman and the current king of the majors, in the All-Stars' All-Star beat for the third straight year. The Yankee first sacker is at the foot of the batless class in the annual frolic but he had the distinction of being the only one to score a run in the first game, another long fly ball in the huge Cleveland stadium but it travelled fully 450 feet to the running track in deep right centre, where Joe Moon dropped it down on the gallop.

Young American Leagueers have produced only two home runs in their first baseball and the current king of the majors, instead of the All-Stars' All-Star beat for the third straight year. The Yankee first sacker is at the foot of the batless class in the annual frolic but he had the distinction of being the only one to score a run in the first game, another long fly ball in the huge Cleveland stadium but it travelled fully 450 feet to the running track in deep right centre, where Joe Moon dropped it down on the gallop.

Dizzy Dean wasn't popular as he dressed after the game.

"Don't throw 'em through there like we used to, can you Diz?" asked a fan.

But Diz came back with a typical Dean answer:

"I didn't have all my stuff working today—but I'll be throwing 'em past all you guys for the rest of the year."

Dizzy Dean wasn't popular as he dressed after the game.
